550022578	KIT DESAGÜE D52	44,26

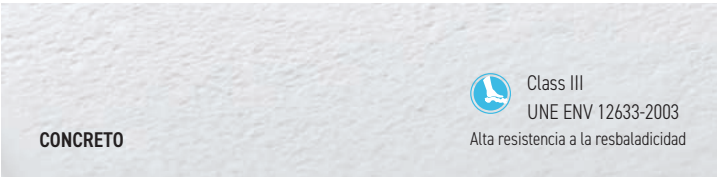

Fabricado con Krion Shell®, compuesto por mineral de alta calidad y una cobertura de KRION®, que le proporciona excelentes características mecánicas.

El plato de ducha Line permite personalizar tanto su longitud, de 75 hasta 210 cm, como su anchura de 70 hasta 100 cm.

Dispone de paneles decorativos para alicatar las paredes, que junto con el embellecedor del mismo color, favorecen a la continuidad visual.

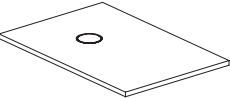

La textura Concreto presenta uno de los valores más altos de antideslizamiento, lo que junto a la fácil limpieza hacen que la elección de esta textura sea muy recomendada para lugares de alta concurrencia, uso de gente con baja movilidad o niños.

Platos de ducha

Con su diseño innovador pensado para que el agua fluya de forma natural sin posibilidad de estancamiento gracias a sus planos inclinados. Su espesor ultrafino de 3 cm permite instalarlo en superficie o encastrado, pensado para que se pueda entrar y salir sin ninguna dificultad. Está realizado con la tecnología Krion Shell®. Desarrollado internamente por KRION. Su amplio desagüe de 90 mm permite evacuar el agua con suma facilidad. Tapa de acero inoxidable. Disponible en dos texturas diferentes Concreto y Silk y cinco colores: blanco, grafito, gris, beige y taupe.

CONCRETO

Class III
UNE ENV 12633-2003
Alta resistencia a la resbaladilidad

La textura Concreto presenta uno de los valores más altos de antideslizamiento, lo que junto a la fácil limpieza hacen que la elección de esta textura sea muy recomendada para lugares de alta concurrencia, uso de gente con baja movilidad o niños.

SILK

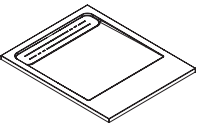

Class I
UNE ENV 12633-2003
Resistencia a la resbaladilidad

La textura Silk se presenta de forma lisa y su resistencia al antideslizamiento es mejor frente a otros tipos de platos. Los acrílicos, cerámicos o metálicos tienen que añadir extras antideslizantes para cumplir esta propiedad, provocando problemas de higiene y limpieza.

Flow

Platos de ducha

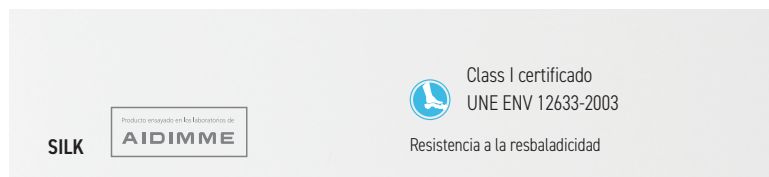

Plato de ducha extraplano realizado con la tecnología Krion Shell®, desarrollado internamente por KRION®. Su nueva textura Rock, ideada para evitar antideslizamientos manteniendo al mismo tiempo un diseño homogéneo, simple y de formas suaves en toda su superficie. Su amplia gama de formatos estándar y sus texturas Silk y Rock ambas en color blanco lo hacen la opción perfecta.

La textura Rock presenta uno de los valores más altos de antideslizamiento, lo que junto a la fácil limpieza hacen que la elección de esta textura sea muy recomendada para lugares de alta concurrencia, uso de gente con baja movilidad o niños.

Blanco

La textura Silk se presenta de forma lisa y su resistencia al antideslizamiento es mejor frente a otros tipos de platos. Los acrílicos, cerámicos o metálicos tienen que añadir extras antideslizantes para cumplir esta propiedad, provocando problemas de higiene y limpieza.
